

In the recent past I have reviewed bit the the ELA/ELD and draft science frameworks. The multidisciplinary role I serve at my county office requires me to be familiar with all content areas. In reading this H/SS draft framework I wanted to comment on 2 things.

1. Chapter 1 is an excellent framing section. Thank you. I was able to read through it and note multiple places where math, science, ELD, project based learning and EEI would easily weave in helping teachers find ways to bring rich context to the H/SS curriculum.
2. On the science framework page there is a section on the EP and C's. There should be such a connection and supporting document with H/SS too, please.

I also hope in citations/resources that project based learning materials like <http://www.ascd.org/Publications/Books/Overview/Setting-the-Standard-for-Project-Based-Learning.aspx> are shared.

Thank you for this document.
